IMPROVEMENTS TO SERVICES

- *Cleaning of Microfilm in Search Rooms* — The Patent and Trademark Office's Files Maintenance Contractor has completed all the microfilm cleaning. This microfilm is located in the Patent Search Room and Trademark Search Library. Users should see an improvement when using the microfilm on the Reader/Printers in both of these areas.

- *Changes to Official Search Notification* — Effective Aug. 1, 1987, the Official Search Unit will no longer mail status letters to the requesters of official searches. Instead, requesters will be contacted by telephone at the end of 30 days and advised of their search status. This process cuts down the time required for status letters to be prepared and mailed to the search requester.

  As in the past, a requester may call the Official Search Unit at any time to inquire as to the status of their search. Calls should be made to the unit's supervisor, Ms. Daisy Johnson, who can be reached on (703) 557-9690. If a status letter is required at the conclusion of an unsuccessful search (up to 30 days), it can be furnished immediately by the supervisor of the File Information Unit (FIU) located in Crystal Plaza Bldg. 3, Rm. 1D01.

Assistant Commissioner
for Administration.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
